

Two background images are shown side-by-side. The left image shows a modern interior with a curved glass partition, teal chairs, and circular pendant lights. The right image shows a dining area with a long dark table, white chairs, and a large ribbed pendant light. The word 'Welcome' is centered over both images.

Welcome

We at GMGR specialise in Architectural Surfaces, Films, and Floorings by partnering with global brands such as Krion, 3M, and Polyflor, exclusively in India. With over 125 years of market presence and the successful completion of more than 9,000 projects, we have established our presence at Delhi, Mumbai, and Bangalore. Our comprehensive solutions encompass design consultation, product supply, and expert installation services, ensuring that our clients receive the highest quality and innovation in every project. We are committed to delivering exceptional results that meet the unique needs of each client, while continuously setting new benchmarks in the industry.

Invisible Joints Achievable

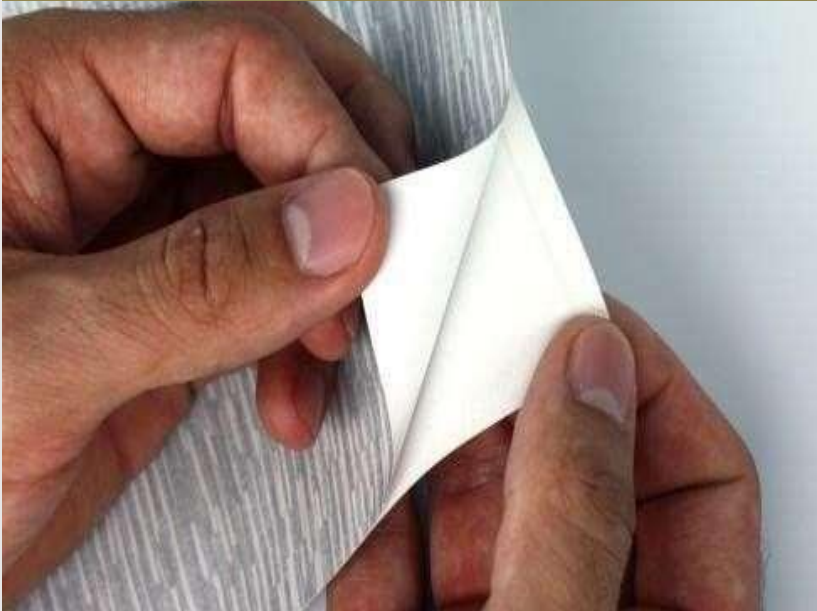

Plotter Cutting Possible

Mildew Resistance

Bubble Free Application

Conformable

Superior Finish – Minimal Joint Lines

With over 100+ unique designs, patterns and textures, 3 M™ Glass Finishes give you an easy way to add that extra element of design to your space.

At 3M we offer a variety of portfolios. Our Glass finish films are ideal for privacy and decorative applications in offices, hotels, retail stores restaurants, healthcare environments, and designed for ease of application and cleaning.

KRION™ is a new generation solid surface developed by the **PORCELANOSA GROUP**.

It is a material that is warm to the touch and is similar to natural stone. It is made of two-thirds natural minerals (ATH – Alumina Trihydrate) and a low percentage of high- resistance resins.

Ultra white / Translucency / Reflectance

Thermoformable

Fire resistance

High tensile strength

- **Air purification**

Chemical degradation:

Nitrogen Oxides

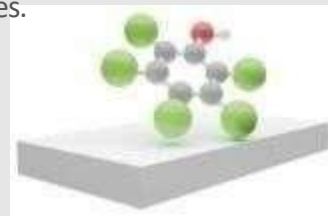

Sulphur Oxides

Volatile Organic Compounds

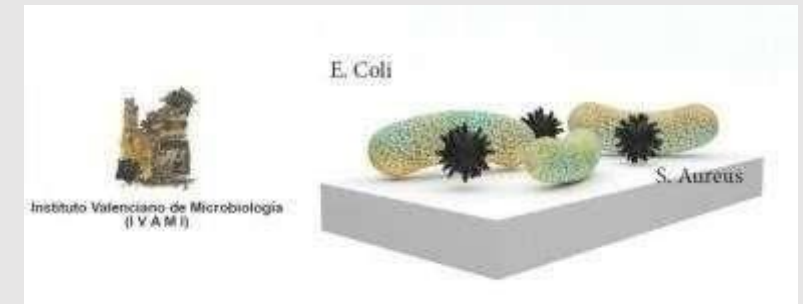

- **Elimination of chemical products**

A large number of compounds that are dangerous to our health have been eliminated, such as pesticides.

- **Anti-bacteria**

Thanks to the new KRION ECO-Active technology, not only can bacteria not grow in the material, but when coming into contact with the surface of the active material, the bacteria is eliminated.

- **Easy to clean**

Liquids and dirt can be cleaned from the surface of the material with greater ease, reducing the use of detergents.

Polyflor, a pioneer in resilient flooring since 1915, offers a diverse range of high-performance vinyl and rubber flooring solutions. Renowned for their durability, versatility, and stylish designs, Polyflor products are engineered to meet the demands of both commercial and residential spaces. With a commitment to sustainability and innovation, Polyflor combines cutting-edge technology with eco-friendly practices to deliver flooring that enhances both function and aesthetics.

Retail Application

Corporate Application

Residential Application

Fitwall® panels have a careful aesthetic based on original creations and also present a series of attractive properties that provide them with the functionality to stop being just a decorative panel, such as impact resistance, fire resistance, repairability and non-porousness. Fitwall panels contains a minimum of 3% PET in their composition, largely from Recycled plastic waste.

ALLUSLATE[®]

aluminium cladding

The PORCELANOSA Group firm has launched a new aluminum and mineral-based panel loaded with natural textures and color. Formed of two aluminum sheets with a thickness of 4 mm, the wall panels feature tropical motifs, exotic fauna and vibrant colors. Plus, they're quick to install, lightweight and easy-to-clean.

kriskadecor

Kriskadecor produce aluminium chain links, a sustainable and infinitely recyclable material with a 99.99% purity.

The quality of kriskadecor chains comes from an internal anodization process which brings them colour, stability and hardness.

Internal controls ensure that the project's end result is hand- checked to make sure that the installation is performed correctly.

A Undora® is the perfect solution for present and future interior design and finishes for construction. Panels with highly realistic textures that are both visibly and tactilely perceptible, as well as having an almost infinite number of designs. material created and produced in our facilities in Vila-real, under a process of eco-responsible R&D and internal design, where aesthetics, functionality and the development of a production process with a low environmental impact and exclusive design have been rewarded.

Interior wooden cladding panels for walls and ceilings with acoustic properties and fire retardancy. Gustafs Panel System is a well-documented wood panel wall and ceiling system that draws on our experience from a wide variety of projects worldwide. Thanks to the development of our Capax profile system we can provide simple and secure installations in tune with today's rapid building processes.
